

Tools

- **Slack channel** - I have set it up Team1 channel within the UXD workplace for efficient team communication
- **WhatsUp** - day-to-day team communication
- **Real-time board** - we both use it to keep track of activities and share assets
- **Balsamic** - I used it to create the final prototype
- **Marvel app** - we both use it for paper prototyping
- **Xtensio.com** - introduced by me, we both used it to create personas
- **DU recorder** - introduced by me, we both used it for android mobile recording
- **Silverback** - introduced by me, we both used it for usability testing (recording participants)
- **Photoshop** - I have used it for video files edition
- **Figma** - I have edited files for prototyping and later on for the blog
- **Excel + Tableau** - was used in consequence of poor survey design to give better insight than Google Summary
- **Chrome extension - Full page Screen Capture** - I have capture long docs/graphics
- **Google Drive** account introduced by me, I have used it to manage the project assets
- **Asana** - I have used it for keeping track of the blog creation process

I did not introduce Asana and Figma into teamwork. The learning curve could be a bit steep and I did not intend to overload my teammate.
